# Challenges of the Project
## IT for practise 2015
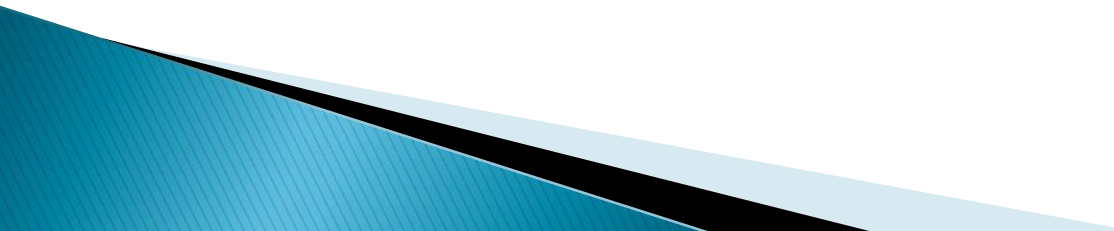

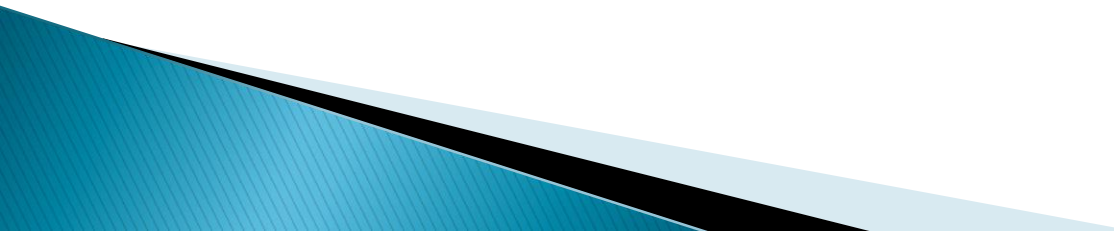

Ing. Radovan Molin

Agenda

- Questions asked
- House Building Project
- System Implementation Project
- My Experience
- Other Project Issue
- Is it a common practice?
- Example of process reigeneering absence
- Challanges of the Project?

Questions asked

▸ What can be considered as a Project?

▸ System Implementation
      vs.
▸ Building a House

House Building Project

- Project Plan with Milestones
- Project Management
- Architect / Designer
- Bricklayers

System Implementation Project

- Project Plan with Milestones
        e.g. ASAP metodology
- Project Management (Steering Comittee etc.)
- Solution Architect / Designer
- „Bricklayers" =>   Consultants
                        Specialists
                        Programmers

My Experience

- Why do I talk about it?
- Situation seems to be very clear.

Project examples: „Bricklayers"

IDS Scheer	AMFM	1 person for SD
IBM	Novartis	1 person for SD
IBM	Prague Airport	**no one for SD**
AMTPO	Accenture	not all project covered by IT specialists, only business people

- Is it possible to carry out the IT project without IT specialists with only business people?
- Business people solve current tasks.
- They are devoted 100% to business.
- What time is left for IT project?

Other Project Issue

▸ Reingeneering of process during system implementation.

TOO LATE !!!
Time and money consuming !!!

Is it a common practice?

- Lots of companies start their projects without sufficient number of staff devoted to project and without previous reingeneering of processes.

Example of process reigeneering absence

- Purchase order of raw material for production is only in paper form in current solution without Product Costing functionality.
- System purchase order is created in closing periods due to goods receipt and invoicing.
- Final product has already been dispatched.

Challanges of the Project?

- Start of project with low people capacity (bricklayers).
- Start of project with wrong project preparation (e.g. Reingeneering).

- Questions?

- Thank you for your attention.
